

# Yealink CP920 IP Conference Phone with HD Audio

## Conferencing, Audio Conferencing Units

The CP920 is an audio conferencing solution essential for any business that frequently conducts meetings and huddle groups with colleagues or customers located away from the premises. Allowing up to five parties to join a conference call from different locations, the CP920 also merges with smartphones, PC/tablets, SIP calls and PSTN calls - turning it into one hybrid UC meeting solution. The CP920 also utilises Yealink's renowned Noise Proof Technology, that reduces annoying background noise interference and the resulting distractions to the meeting environment. With an additional 20-foot (6-metre) and 360-degree voice pickup range, plus professional HD audio output as standard - the meeting or huddle session will take place as if all participants are sitting across the table from each other.

**Manufacturer Code:** CP920

**Item Code:** 60890

**Warranty:**  
LIFETIME WARRANTY
